Call / WhatsApp: +91 83039 67740 | +91 75250 35558

Private professional training • Certificate of Course Completion

01 | WELCOME

A professional learning pathway for BAMS Doctors

A structured three-month programme designed to strengthen clinical reasoning, fertility-focused Ayurvedic practice and professional practice development.

The SNC Ayurvedic Fertility & Reproductive Health Treatment Course is a private professional training programme for BAMS Doctors who want a more structured approach to Female & Male Fertility and Reproductive Health cases. The programme combines clinical learning, contemporary investigation correlation, Ayurvedic treatment planning, case-based discussion, counselling, follow-up, referral logic and practice-development skills.

LEARN. EVALUATE. PLAN. APPLY. BUILD.

The programme moves from clinical thinking and case assessment to individualized management, patient communication and focused practice development.

Clinical Thinking

Move beyond symptom-based prescribing and build a structured case-to-management approach.

Female + Male Fertility

Assess fertility concerns with a couple-focused perspective and understand relevant female and male factors.

Modern Investigation Correlation

Interpret commonly used fertility investigations and connect findings with clinical decision-making.

Natural Conception Focus

Learn a structured Ayurvedic approach to support couples trying to conceive naturally, without promising or guaranteeing pregnancy.

Case-Based Learning

Use clinical scenarios, reasoning frameworks and practical discussions to strengthen application.

Practice Development

Learn patient communication, local visibility, content, consultation workflow and ethical practice-building.

02 | INSTITUTION

About SNC Health Medico

Nurturing Health through Ayurvedic healthcare, professional learning and patient-centred practice.

SNC Health Medico is the professional ecosystem behind the programme. The organisation works across Ayurvedic healthcare, patient education, wellness-oriented services and professional learning initiatives. The fertility course is designed as a focused educational initiative for BAMS Doctors seeking structured clinical and practice-development learning.

Our Learning Philosophy

Clinical reasoning before prescription; structured assessment before intervention; individualized planning rather than one-size-fits-all protocols.

Patient-Centred Practice

Emphasis on informed communication, expectation setting, documentation, follow-up and appropriate referral.

Ayurveda + Contemporary Correlation

Ayurvedic clinical frameworks are taught alongside interpretation of commonly used modern investigations for better case understanding.

Professional Growth

Clinical learning is complemented by practice systems, patient education, communication, digital presence and ethical patient acquisition.

PROGRAMME INTENT

To help BAMS Doctors develop a more structured, practical and clinically reasoned approach to fertility and reproductive-health cases — while building the professional systems required for a focused practice.

03 | PROGRAMME OVERVIEW

Programme at a Glance

The key details at a glance—who the programme is for, how learning is delivered and what the certificate represents.

PROGRAMME	SNC Ayurvedic Fertility & Reproductive Health Treatment Course
AUDIENCE	BAMS Doctors
COMMENCEMENT	January 2027
DURATION	3 months
MODE	Online live video sessions
LEARNING FORMAT	Structured modules, case-based learning, live Q&A; and study resources
ASSESSMENT	Knowledge evaluation and case-based learning activities, as scheduled by the programme
CERTIFICATE	Certificate of Course Completion issued by SNC Health Medico, subject to programme requirements
PROGRAMME TYPE	Private professional training programme
COURSE FEE	₹9,999/- (early bird ₹6,499/- till 30 Nov 2026)

Important positioning

This is a private professional training programme. It is not a university degree, diploma, postgraduate qualification, specialist qualification or government-recognised academic award. The certificate records course completion only and does not expand a practitioner’s statutory scope of practice.

04 | RATIONALE

Why this programme?

Fertility cases often require more than a list of medicines. Doctors need a repeatable clinical framework: how to take the case, understand the couple, select relevant investigations, interpret reports, identify red flags, plan individualized care, communicate expectations and monitor progress.

From Symptoms to Clinical Reasoning

Understand the difference between a presenting complaint and the broader clinical picture.

From Reports to Decisions

Learn how common fertility investigations can inform clinical thinking without treating a laboratory value in isolation.

From Prescriptions to Protocol Logic

Understand why an intervention may be considered, when it may be modified and when referral is appropriate.

From Consultation to Follow-up

Create a clear patient journey with documentation, counselling, review points and progress monitoring.

From Individual Cases to Practice Systems

Build consultation, communication and follow-up systems that are easier to reproduce consistently.

From Course to Continued Learning

Use case discussion and post-course support to continue developing clinical confidence.

THE CORE PROMISE

Structured learning, practical application and continued guidance — without promising guaranteed clinical outcomes.

05 | ELIGIBILITY

Who should join?

BAMS Doctors

The programme is exclusively designed for BAMS Doctors.

Existing Practitioners

Useful for doctors already seeing fertility, reproductive-health, lifestyle or related cases.

Doctors Building a Focus

For doctors who want to develop a focused fertility-oriented clinical practice.

Doctors Seeking Structure

For practitioners who want a systematic approach to case taking, investigation correlation and treatment planning.

WHO THIS PROGRAMME IS NOT FOR

It is not a substitute for a recognised postgraduate qualification, specialist training, hospital credentialing or statutory registration. It does not authorise practice beyond the practitioner’s applicable legal scope.

Recommended baseline: Active BAMS qualification/registration status as applicable to the practitioner, basic clinical exposure and willingness to participate in live case-based learning.

06 | CURRICULUM

Female Fertility & Reproductive Health

A structured clinical learning framework covering common and complex fertility and gynaecological concerns.

PCOS / PCOD
Clinical patterns, cycle concerns, metabolic context and individualized planning.

Irregular / Early / Delayed Periods
History, cycle assessment, differential thinking and relevant investigations.

Low AMH / Ovarian Reserve Concerns
Interpretation, clinical context, counselling and referral considerations.

Ovulation-Related Concerns
Cycle tracking, ovulation assessment and case-based planning.

Endometriosis
Clinical presentation, supportive Ayurvedic planning and referral logic.

Fibroids & Adenomyosis
Case assessment, symptom context, investigations and individualized supportive care.

Ovarian Cysts
Understanding presentation, report context and when specialist evaluation is required.

Tubal Blockage
Understanding HSG-related findings, limitations of Ayurvedic management and referral.

Recurrent Pregnancy Loss
Supportive clinical framework, investigation awareness and appropriate specialist coordination.

Thyroid & Fertility
Correlation of thyroid reports with history, symptoms and fertility context.

Unexplained / Delayed Conception
Couple-focused evaluation and structured clinical reasoning.

Failed IVF / IUI
Supportive Ayurvedic approach, expectations and coordination with fertility specialists.

Special focus: Preconception care • menstrual and ovulation health • Garbhasanskar concepts • Panchakarma integration • Uttar Basti selection, logic and limitations • diet, lifestyle and stress management.

ADDITIONAL FEMALE REPRODUCTIVE-HEALTH COVERAGE

Leucorrhea / vaginal discharge • PID / pelvic-health concerns • painful periods / dysmenorrhea

Heavy menstrual bleeding • early / frequent periods • menopausal transition • other gynaecological concerns

PCOS / PCOD: 20+ clinical patterns

Pattern-based assessment, phenotype/context differentiation, investigation correlation and individualized planning.

07 | CURRICULUM

Male Fertility & Reproductive Health

A structured approach to male fertility, sexual health and reproductive-health concerns.

Low Sperm Count
Understand semen parameters and clinical decision-making.

Poor Sperm Motility
Interpret motility findings and consider modifiable factors.

Abnormal Morphology
Understand morphology and its clinical context.

Semen Abnormalities / Pus Cells
Recognise abnormal findings and when further evaluation is needed.

Erectile Dysfunction
Consider psychological, lifestyle and organic factors.

Premature / Ejaculatory Concerns
Structured assessment, communication and supportive planning.

Low Libido
History, lifestyle, psychological and hormonal context.

Testosterone-Related Concerns
Correlate testosterone findings with symptoms and clinical presentation.

Prolactin / Hormonal Concerns
Understand relevant hormone reports and when to investigate further.

Stress & Lifestyle Factors
Address sleep, stress, exercise, diet, smoking and other modifiable factors.

Sexual & Reproductive Health
Counselling and supportive Ayurvedic clinical planning.

Referral & Advanced Care
Recognise situations requiring urological, andrological or specialist evaluation.

Report interpretation focus: Semen analysis • Testosterone • Prolactin • LH/FSH • Thyroid and relevant metabolic markers • clinical correlation with history and symptoms.

ADDITIONAL MALE FERTILITY & LIFESTYLE COVERAGE

Addiction / substance-use factors • smoking • alcohol • gym / steroid-related lifestyle factors • sleep & recovery

Psychological vs organic contributors • performance anxiety • relationship / counselling considerations

Report interpretation focus also includes

HbA1c • vitamin D / B12 • CBC and selected metabolic / deficiency markers where clinically relevant.

08 | CLINICAL FRAMEWORK

From Case to Clinical Management

A 12-step framework designed to make clinical decision-making more structured.

01	Patient Case Taking & Couple Evaluation Detailed history, lifestyle, menstrual, sexual and reproductive assessment.
02	Fertility Investigations & Report Interpretation Hormonal tests, USG, HSG, semen analysis and other relevant investigations.
03	Ayurvedic Diagnosis & Clinical Correlation Integrate Ayurvedic assessment with the broader clinical picture.
04	Individualized Treatment Planning Build a plan based on presentation, patient profile and clinical priorities.
05	Medicines & Formulation Selection Classical and proprietary formulation logic, dose, anupana, duration and modification.
06	Panchakarma in Fertility Care Indications, selection, clinical logic, limitations and safety considerations.
07	Diet & Lifestyle Planning Practical, sustainable and individualized recommendations.
08	Patient Counselling & Communication Expectation setting, couple guidance and supportive communication.
09	Follow-up & Progress Monitoring Assess response, document changes and modify the plan.
10	IVF / IUI Supportive Approach Understand supportive care and when coordination with fertility specialists is required.
11	Red Flags, Referral & Clinical Decisions Recognise situations requiring advanced evaluation or specialist coordination.
12	Case-Based Clinical Discussions Apply the framework to practical clinical scenarios.

09 | PROGRAMME ARCHITECTURE

Four Power Pillars • Twelve Modules

PILLAR 1 — CLINICAL THINKING & FERTILITY MASTERY

Module 1: Doctor Thinking System — case taking, root-cause thinking, red flags, referral and follow-up decisions.

Module 2: Female Clinical Mastery — PCOS/PCOD, infertility approach, low AMH, ovulation, fibroid, cyst, endometriosis, preconception.

PILLAR 2 — PROTOCOL & MEDICINE DECISION SYSTEM

Module 3: Male Clinical Mastery — semen parameters, ED, PE, libido, hormonal and lifestyle factors.

Module 4: Report Reading & Modern Correlation — AMH, FSH/LH, TSH, prolactin, testosterone, USG, HSG and semen analysis.

PILLAR 3 — TREATMENT & PRACTICE SYSTEM

Module 5: Ayurvedic Protocol Library — condition-based frameworks and case-based treatment planning.

Module 6: Medicine Decision System — classical vs proprietary logic, dose, anupana, duration, modification and when oral care/Panchakarma may be considered.

PILLAR 4 — PRACTICE, BRAND & PATIENT COMMUNICATION

Module 7: Panchakarma & Supportive Care — selection, limitations and integration.

Module 8: Clinic Setup & OPD Workflow — records, consent, documentation, consultation structure and patient experience.

Additional professional modules: Practice pricing and packages • patient communication • local visibility • content creation • personal branding • social media strategy • ethical patient acquisition • referral systems • long-term patient engagement.

10 | DETAILED CURRICULUM

Modules 9–12: Practice, Branding & Professional Systems

Module 9 — Legal, Registration & Safety Framework

- BAMS scope and professional responsibility
- Clinic and pharmacy registration basics
- AYUSH / trade / GST overview
- Consent, documentation and patient-safety principles
- Ethical communication and referral logic

Module 10 — Practice Growth System

- Consultation and package structuring
- Fertility programme design
- Patient journey mapping
- Follow-up and retention systems
- Referral and relationship-building strategies

Module 11 — Doctor Personal Brand System

- Professional positioning
- Instagram authority framework
- Reel structure: Hook → Problem → Truth → Solution → CTA
- Local reputation and Google profile basics
- Doctor-led educational content

Module 12 — Communication, Content & Trust System

- What to say and what to avoid
- Patient education scripts
- Ethical testimonial and social-proof principles
- Consultation communication
- Trust-building and expectation management

MEDICINE KNOWLEDGE & CLINICAL DECISION-MAKING

- Classical Ayurvedic medicines and commonly used formulations relevant to fertility & reproductive-health practice
- Medicine selection according to clinical presentation, Ayurvedic assessment and treatment objectives
- Understanding indications, contraindications, precautions and appropriate clinical use
- Dosage, anupana, duration and treatment modification principles
- Combining medicines with diet, lifestyle, Panchakarma and supportive care where clinically appropriate
- Monitoring response, follow-up and knowing when to modify, stop or refer
- Ethical prescription practices and responsible patient counselling

CLINICAL PROTOCOL LIBRARY — CASE-BASED FRAMEWORKS

PCOS / PCOD • Male infertility • ED / PE • Weight + hormone correction • Stress & fertility recovery

Protocols are taught as structured clinical frameworks, with individualized assessment, follow-up and referral when required.

11 | OUTCOMES

Core Competencies & Learning Outcomes

No.	Core competency
1	Conduct a structured fertility case history and couple-focused evaluation.
2	Recognise clinically relevant female and male fertility factors.
3	Interpret commonly used fertility investigations in their clinical context.
4	Develop individualized Ayurvedic treatment-planning frameworks.
5	Understand medicine selection, dose, anupana, duration and modification logic.
6	Integrate diet, lifestyle, stress and preconception considerations.
7	Understand when Panchakarma may be considered and its limitations.
8	Counsel patients with clearer expectations and appropriate communication.
9	Monitor follow-up, document progress and recognise the need for referral.
10	Discuss supportive approaches around IVF/IUI while coordinating appropriately with specialists.
11	Develop a structured fertility-focused OPD and patient journey.
12	Build ethical patient-education, local visibility and professional communication systems.

12 | LEARNING METHODOLOGY

How the Programme is Delivered

Live Interactive Sessions

Real-time teaching with opportunities for questions and discussion.

Case-Based Learning

Clinical scenarios used to demonstrate reasoning, investigation correlation and treatment planning.

Clinical Resources

Structured study material, protocol resources, case-paper and practice templates.

Knowledge Evaluation

Planned assessments/activities to reinforce understanding and application.

Doubt Clarification

Dedicated opportunities to clarify clinical and practice-related questions.

Applied Practice

Focus on translating learning into a structured consultation and follow-up workflow.

Learning component	Purpose
Concept teaching	Build the clinical framework
Case discussion	Translate concepts into clinical reasoning
Report interpretation	Connect findings with decisions
Treatment planning	Develop individualized frameworks
Counselling	Improve patient communication and expectation setting
Practice development	Build systems for focused professional growth

13 | ASSESSMENT & EVALUATION

Learning Evaluation Framework

Assessment is designed to reinforce clinical reasoning rather than rote memorisation.

Case-Based Exercises

Analyse selected clinical scenarios and identify the key assessment priorities.

Investigation Interpretation

Work through commonly used reports and identify relevant clinical questions.

Treatment-Planning Exercises

Build structured plans and explain the reasoning behind the approach.

Knowledge Checks

Short assessments to reinforce key concepts and clinical frameworks.

Participation matters: Live engagement, case discussion and completion of assigned learning activities are intended to strengthen application.

CERTIFICATION CRITERIA

The Certificate of Course Completion is issued by SNC Health Medico to participants who satisfy the programme’s applicable completion requirements. It is not a degree, diploma, PG qualification or specialist credential.

14 | PRACTICE DEVELOPMENT

Build a Patient-Centred Fertility Practice

A major differentiator of the programme is that clinical learning is paired with practical guidance on developing a professional patient journey. The objective is not to promise patient numbers, but to teach ethical systems that can improve visibility, communication, conversion and long-term engagement.

01 — Local Patient Visibility

Google Business Profile basics • local search presence • offline/community visibility

02 — Social Media Guidance

Educational reels • content pillars • doctor positioning • patient engagement

03 — Consultation Communication

How to explain the case • set expectations • handle enquiries • improve consultation flow

04 — Clinic Setup & Packages

Service structure • patient journey • pricing logic • programme/package presentation

05 — Follow-up & Retention

Review systems • patient education • trust-building • appropriate referral and continuity

Patient acquisition principle: Doctors are taught to build visibility and trust through professional education, clear communication and patient-centric systems — not through misleading claims or guaranteed outcomes.

PRACTICE DEVELOPMENT | PATIENT ACQUISITION & CONVERSION

Don’t Just Learn the Course.
Learn How to Build Your Practice.

The programme goes beyond clinical learning. Along with Fertility & Reproductive Health, doctors learn practical systems to build visibility, attract relevant patients, communicate their value, convert genuine enquiries into consultations and create a sustainable practice.

CLINICAL LEARNING + PATIENT ACQUISITION + CONVERSION + PRACTICE GROWTH

Build a structured system so your learning can translate into a focused professional practice.

01 BUILD YOUR PATIENT BASE

- Local visibility & positioning
- Instagram / content strategy
- Google presence & patient education
- Referral & community-building systems

02 TURN ENQUIRIES INTO CONSULTATIONS

- Lead handling & response framework
- Patient communication scripts
- Understanding patient concerns
- Ethical consultation conversion

03 BUILD TRUST & RETENTION

- Consultation experience
- Counselling & expectation setting
- Follow-up systems
- Patient education & long-term engagement

04 BUILD A SUSTAINABLE PRACTICE

- Clinic workflow & documentation
- Consultation / package structuring
- Practice branding & professional positioning
- Referral, repeat-care & growth systems

WHAT THIS MEANS FOR YOU

✓ Learn the clinical framework — then learn how to communicate and apply it in practice.
✓ Develop a focused fertility-oriented professional identity instead of relying only on walk-in patients.
✓ Build systems for enquiries, consultations, follow-up and patient engagement.
✓ Work towards stronger clinical confidence, professional visibility and a sustainable practice model.

THE GOAL: LEARN • APPLY • ATTRACT • CONVERT • GROW

By the end of the programme, you should have a clearer clinical approach plus practical, ethical systems for building and developing your own focused fertility practice.

Patient numbers, conversions or earnings are not guaranteed. Outcomes depend on clinical competence, ethical practice, local demand, consistency, communication and applicable professional/regulatory requirements.

15 | SPECIAL FOCUS

Natural Conception with Ayurveda

HELP COUPLES WORK TOWARDS NATURAL CONCEPTION WITH AYURVEDA

Learn a structured Ayurvedic approach to support couples trying to conceive naturally, covering both female and male fertility factors.

Preconception Care

Couple-focused assessment, lifestyle optimisation and preparation.

Menstrual & Ovulation Health

Understand cycle patterns and ovulation-related concerns.

Male Fertility Factors

Semen parameters, lifestyle, stress and relevant hormonal considerations.

Diet & Lifestyle

Individualised recommendations that are practical and sustainable.

Stress & Behavioural Factors

Address sleep, stress, exercise and other modifiable influences.

Individualised Planning

Build care plans around the patient’s presentation and clinical context.

Clinical boundary: Pregnancy or conception cannot be guaranteed. Fertility cases requiring advanced investigation, procedures or specialist management should be appropriately referred or co-managed.

16 | RESOURCES

The SNC Professional Learning Ecosystem

Clinical Resources

Case-taking formats • clinical checklists • investigation interpretation guides • follow-up structures

Treatment Resources

Protocol frameworks • medicine-selection references • diet & lifestyle planning formats

Practice Resources

Prescription formats • consent formats • documentation templates • patient journey systems

Patient Education

Educational content frameworks • counselling scripts • expectation-setting resources

Brand Resources

Content templates • positioning guidance • local visibility and digital communication resources

Learning Support

Live Q&A • case discussion • post-course clinical guidance within the programme support framework

DESIGNED TO BE USED — NOT JUST READ

The programme resources are intended to help doctors translate learning into repeatable clinical and professional workflows.

17 | CONTINUITY

Continued Clinical Support After the Course

The learning journey does not end with the final live class. The programme includes a defined post-course support framework intended to help participants discuss selected real-world cases, clarify doubts and continue developing their clinical approach.

Case Discussion Support

Discuss selected patient scenarios and identify the next clinical questions.

Treatment-Planning Guidance

Clarify the logic of treatment selection and appropriate modification.

Follow-up Support

Discuss response monitoring and when a case needs a revised plan.

Referral Discussion

Recognise red flags and situations that require advanced/specialist evaluation.

Practice Guidance

Continue receiving guidance on patient communication and practice systems.

Mentorship Mindset

Use ongoing discussion as a bridge from structured learning to greater clinical confidence.

Important: Post-course support is educational/mentorship support and does not replace independent professional judgement, statutory requirements, specialist consultation or emergency medical care.

18 | FACULTY & MENTORSHIP

Programme Leadership

A multidisciplinary faculty structure supporting clinical learning, case-based discussion and practice-development learning throughout the programme.

PROGRAMME DIRECTOR

Dr. Shubham Agarwal

BAMS

Course Director, SNC Health Medico

Programme leadership • clinical framework • case-based learning

CLINICAL FACULTY & MENTOR

Dr. Berde

BAMS, MD

Clinical teaching & mentorship

Fertility-focused clinical learning • case discussion • treatment-planning approach

CLINICAL FACULTY & MENTOR

Dr. Priya Tiwari

BAMS, MD

Clinical teaching & mentorship

Female reproductive health • clinical reasoning • case-based learning

ADDITIONAL DOCTORATE FACULTY & SUBJECT EXPERT TEAM

Four additional doctor/subject-expert contributors may support specialised sessions and case discussions.

01 **Fertility & Reproductive Health**
Specialised clinical perspectives, case discussions and evidence-informed fertility learning.

02 **Female Reproductive Health**
Condition-focused teaching, investigation correlation and patient-centred clinical reasoning.

03 **Male Reproductive Health**
Male fertility, reproductive concerns, investigation interpretation and counselling approach.

04 **Diagnostics & Integrative Practice**
Report interpretation, referral logic, safety considerations and multidisciplinary coordination.

Faculty participation, session allocation and subject-expert involvement may vary by batch.
Final faculty/session details will be communicated to enrolled participants.

ACADEMIC APPROACH

Structured modules • practical clinical reasoning • case discussion • professional ethics • patient-centred communication

19 | PROFESSIONAL SCOPE & SAFETY

Professional & Legal Positioning

The programme is designed as private professional education for BAMS Doctors. It is not presented as a new medical qualification and does not confer specialist status. Participants remain responsible for practising only within their applicable registration, statutory scope, professional ethics and local requirements.

Certificate Position

Certificate of Course Completion from SNC Health Medico; no claim of university equivalence or government recognition.

Practice Scope

Course completion does not expand statutory scope of practice or substitute for recognised postgraduate/specialist training.

Referral & Safety

Red flags, specialist coordination and referral are integral parts of the clinical framework.

Advertising & Claims

Marketing and patient communication should avoid false, misleading or guaranteed therapeutic/pregnancy claims.

Regulatory reference reviewed for this prospectus: NCISM Act/regulatory framework, including the National Commission for Indian System of Medicine (Ethics and Registration) Regulations, 2023; and the Drugs and Magic Remedies (Objectionable Advertisements) Act, 1954. These sources support the emphasis on professional ethics, registration and avoiding misleading therapeutic advertising.

This prospectus is educational/marketing material, not legal advice. Applicable State and local requirements should be checked before clinical or business implementation.

21 | FAQS

Frequently Asked Questions

Quick answers to common questions about eligibility, delivery, course content and professional boundaries.

QUESTION	ANSWER
Who can enrol?	BAMS Doctors.
When does the next batch start?	January 2027.
How long is the programme?	3 months.
Is it live?	Yes. The programme is delivered through online live video sessions, with structured resources and case-based learning.
What is the course fee?	₹9,999/- (early bird ₹6,499/- till 30 Nov 2026).
Will I receive a certificate?	Yes. A Certificate of Course Completion is issued by SNC Health Medico, subject to programme completion requirements.
Is this a diploma or degree?	No. It is a private professional training programme; it is not a degree, diploma or specialist qualification.
Will I learn both male and female fertility?	Yes. Both are core learning areas.
Will investigations and reports be covered?	Yes. Common fertility investigations and their clinical context are covered.
Will I get practice-development guidance?	Yes. Clinic workflow, communication, local visibility, content and ethical enquiry-handling systems are included.
Is there support after the course?	A defined post-course clinical/practice support framework is included, subject to programme terms.
Does the course guarantee pregnancy, patients or income?	No. Pregnancy, clinical outcomes, patient acquisition and income are not guaranteed.
